

TO CHEMISTS' ASSISTANTS.

WANTED a YOUNG MAN as JUNIOR ASSISTANT.

For address, apply to Mr. Sandford, Stationer, 315, Oxford Street.

PARTNERSHIP.

The Advertiser, a Chemist and Druggist (Member of the Pharmaceutical Society), established seven years, in one of the principal thoroughfares in Bristol, having a good Dispensing trade, but capable of very great extension, is desirous of meeting with a Young Man as PARTNER. One who understands Cupping, Bleeding, and Tooth extracting would be preferred. None need apply who cannot command £150 to £200, or to any parties in business wishing a branch establishment would find this an excellent opportunity.

Apply for further particulars to R. Z., Post-Office, Bristol.

TO PRACTICAL CHEMISTS.

An excellent opportunity now occurs for a Chemist and Druggist, familiar with PRACTICAL CHEMISTRY, to enter upon an established Concern (under particularly advantageous circumstances) centrally situated in the City. This is worthy the serious attention of any one who can command about £500.

Apply to Mr. ORRIDGE, Chemist and Transfer Agent, 30, Bucklersbury.

ANSELL AND HAWKE,

No. 8, GREAT QUEEN STREET,

LINCOLN'S INN FIELDS,

Beg to inform Gentlemen commencing or altering in the above Profession, that they have a large Assortment of Drawers, Bottles, Jars, and every requisite for completing Shops or Surgeries, on the most moderate terms.

Most satisfactory references can be given as to style and quality.

Plans and Estimates furnished.

Valuation of Stock and Fixtures.

**PRESERVED LEMON JUICE,
ONE SHILLING per lb.**

The attention of Chemists and Druggists, especially those resident in the Country, is particularly directed to the above preparation. It is the real juice of the Official Lemon (*Citrus Limonum*), and not an artificial compound. By a peculiar chemical process the greater part of the mucilage, &c. is got rid of, and the pure juice remains in such a state, that it will keep good for any length of time with care.

Note.—This preparation is invaluable for Dispensing, and is likewise the only preparation with which the *Syr. Limonum*, P. L. can be made in a high state of perfection, and in such a manner that it will not become rosy or crystallize by keeping.

To be prepared direct from the proprietor, JOHN FORDRED, Practical Chemist, Church Street, Hackney; or through the medium of Messrs. HODGKINSONS and TONGE, 213, Upper Thames Street, MESSRS. DREW, HEYWARD, and Co., and other London Wholesale Houses.

MATICO.

A NEW SUPPLY JUST RECEIVED FROM PERU. The Members of the Medical and Surgical Profession are respectfully informed, that the new Styptic—MATICO—may be procured in any quantity, and every form, at Thomas Keating's, 79, St. Paul's Churchyard. A sample of the plant, together with a copy of the Third Edition of "Remarks on the Efficacy of Matico as a Styptic and Astringent, with Cases, Modes of Exhibition, &c. &c., by Thomas Jeffreys, M.D., of Liverpool," may be obtained (postage free) in any part of the kingdom, by sending a prepaid order, enclosing eighteen penny postage stamps, addressed to "Mr. KEATING, 79, ST. PAUL'S CHURCHYARD, London."

* * * See *London Medical Gazette* of September 26, 1845, p. 962.

PATENT**VULCANIZED INDIA RUBBER.**

CHARLES MACINTOSH and Co. beg to inform the Public that they are the Patentees and sole Manufacturers of the above Substance. The distinguishing properties of the Patent Vulcanized India Rubber are, its uniform elasticity in various temperatures; its not becoming hard on exposure to extreme cold, nor liable to injury from contact with heat. Its strength is greater than that of native caoutchouc; it is indissoluble in essential oils; it resists the effects of oil and grease in different degrees, according to the purposes for which it is manufactured. Among the various useful applications of the Patent Vulcanized India Rubber, may be enumerated—WASHERS or RINGS for joints in steam and water-pipes, and for valves for steam-engines; by which labour is economised, and the joints more effectually made, than by any other mode. ELASTIC BANDS, for holding together bundles of letters, papers, &c. In ARTICLES of DRESS—Springs for waistcoat-backs and trowsers, straps for trowsers, brace-ends, garters, &c. In CALICO-PRINTING, the substitute for blanket has been found to produce a much finer impression than the woollen hitherto used, and with considerably less pressure; hence a saving in power and wear of lapping. COVERS for furnishing rollers (in lieu of flannel), are perfect for their purpose; and, as the India Rubber does not absorb moisture, they can be easily cleansed, and no colour need be wasted. FLEXIBLE HOSE for fire-engines, brewers' purposes, gas, &c. SPRINGS for Railway and other Vans and Carriages, and for buffers and drags. CORRUGATED FELT, for placing between the rails and the chairs of railways, on the sleepers, to take off the ultimate concussion, and to prevent in wooden continuous sleepers the embedding of the rails, &c.

Cambridge-street, Chorlton-upon-Medlock,
Manchester, April, 1846.

Samples of the above may be seen at 46, Cheapside, and 58, Chancery Lane.
